

MY PERSONAL PORTFOLIO

1.INTRODUCTION

1.1 OVERVIEW

Personal portfolios are a constant that must be maintained throughout our career. We may easily exhibit samples of our work, biographical information, and previous completed projects to better explain to our clients why they should utilise our services for their benefits. The interesting part is that you don't have to be a graphic designer to develop a visually appealing portfolio. Furthermore, it aids you in obtaining new assignments and achieving success in your job/business.

1.2 Purpose

A portfolio is a dynamic, evolving collection of records that documents your achievements, talents, experiences, and characteristics. It includes samples of some of your best work, as well as information on your life experiences, values, and accomplishments. The personal information you provide in your portfolio can reveal a lot about you as a person while also serving as a useful resource.

2 Literature Survey

2.1 Existing Problem

As we always dream about a best career we need to built a good and strong background to showcase our talent. If we take a 10 pages resume to the interviewer that looks too bad ,as to minimize this case we need to built a digital portfolio to look different. And some of the common problems using this digital portfolio is:

- Addressing the wrong audience
- Too much work on show

- Lack of context
- Too little work on show
- A lack of purpose
- It doesn't work on mobile
- It's out of date

2.2 Proposed Solution

Professional portfolios creatively present the storey and arc of your complete professional career, highlighting both your past achievements as well as your desired contributions and future potential. Portfolios may weave together your core beliefs, abilities, and talents in an integrated fashion with your experience, education, and passion projects when they are built with intention.

3 Theoretical Analysis

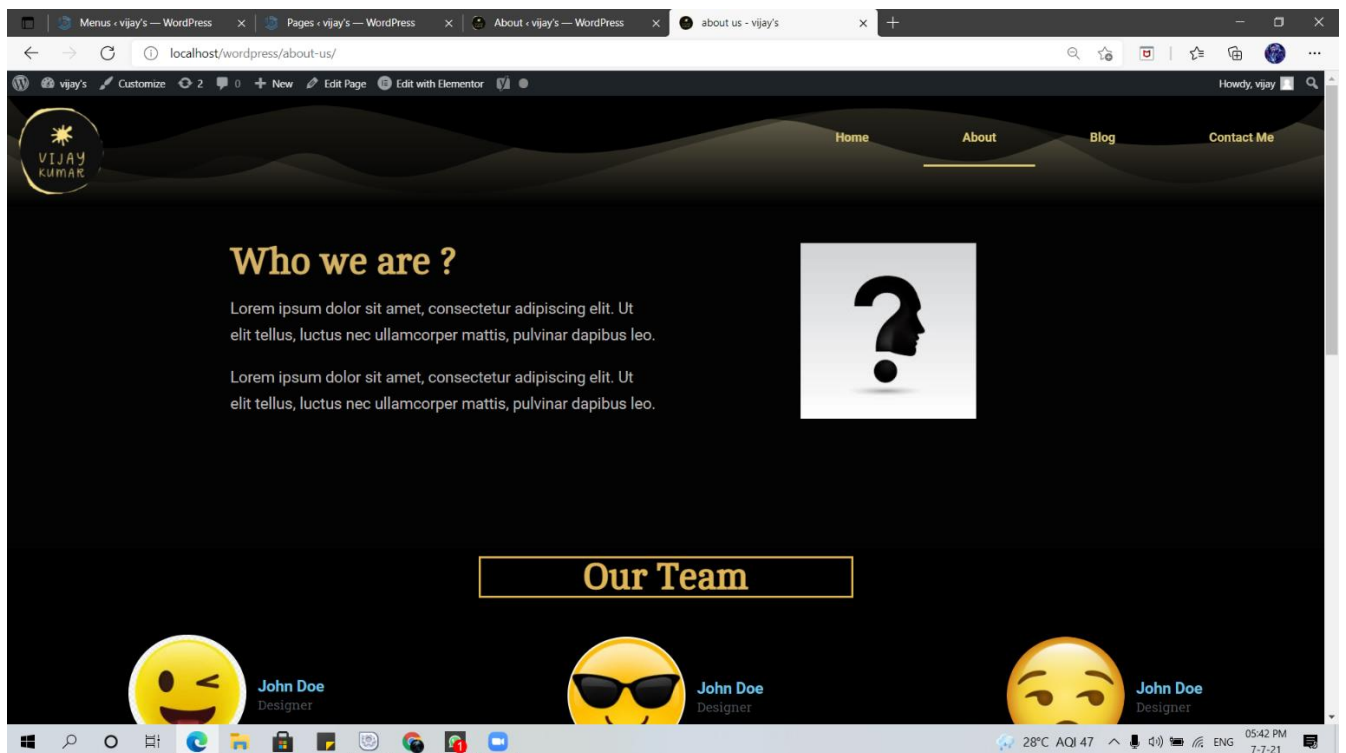

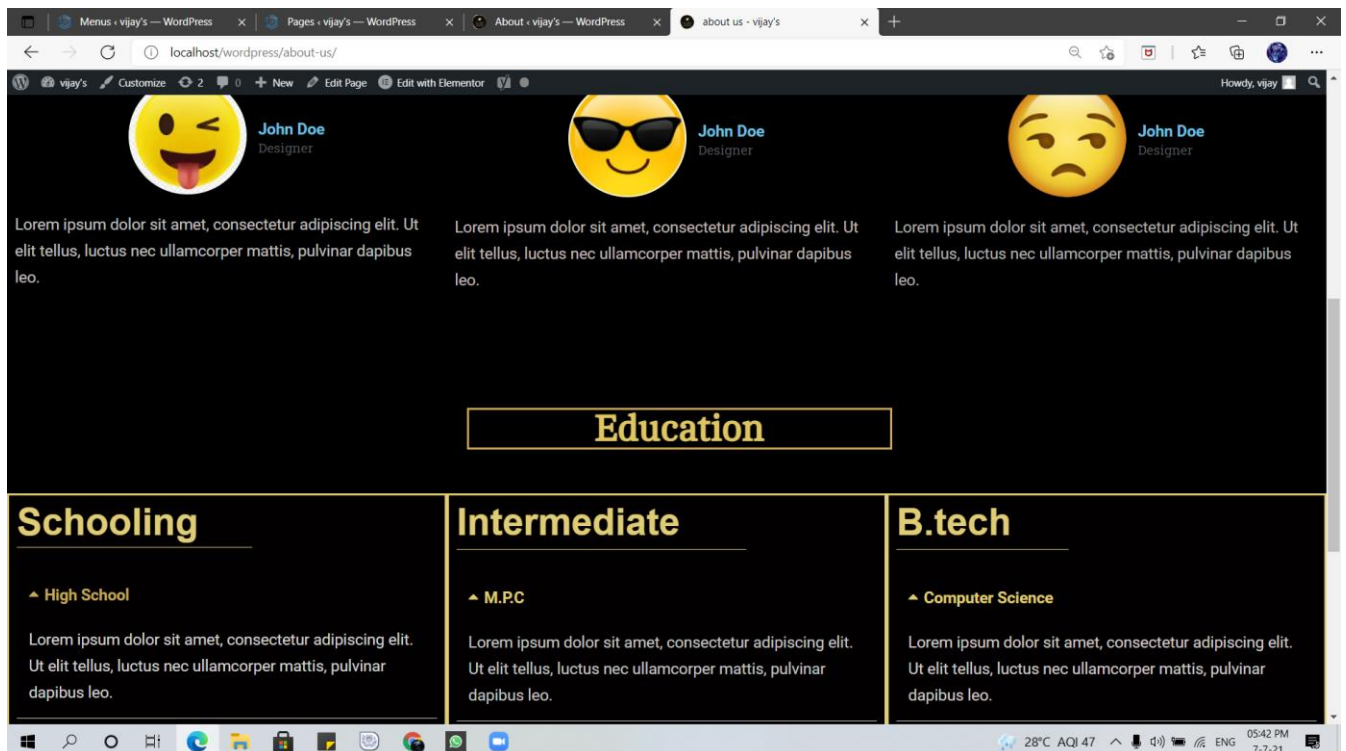

3.1 Hardware / Software designing

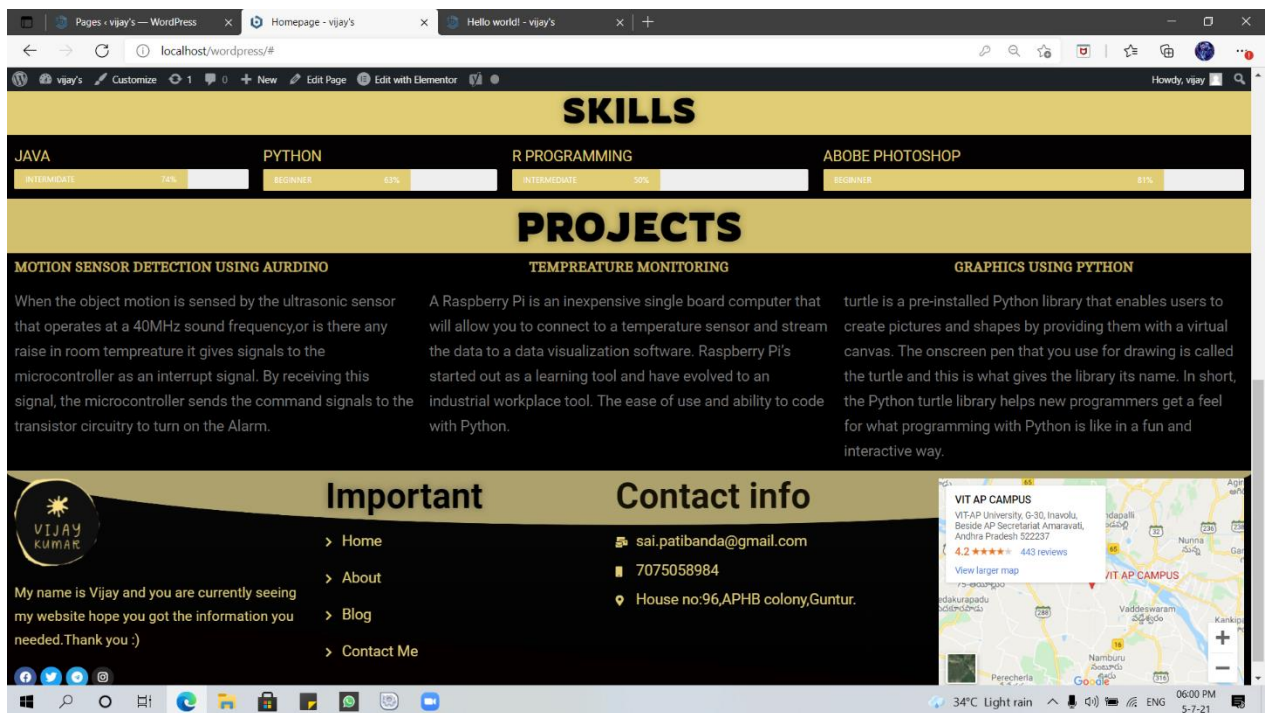

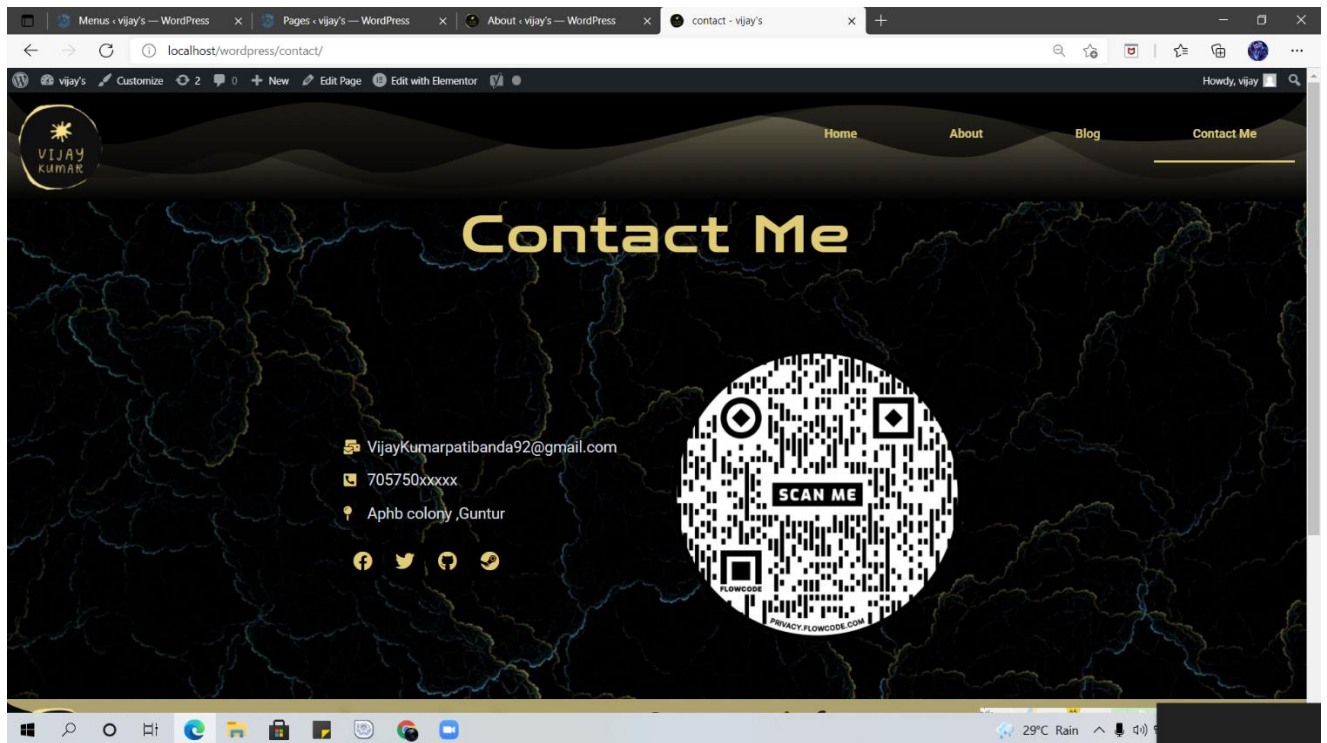

WordPress is a Software that makes webpages is a core analogy designed to clarify the functions of WordPress: it stores content and enables a user to create and publish webpages, requiring nothing beyond a domain and a hosting service.

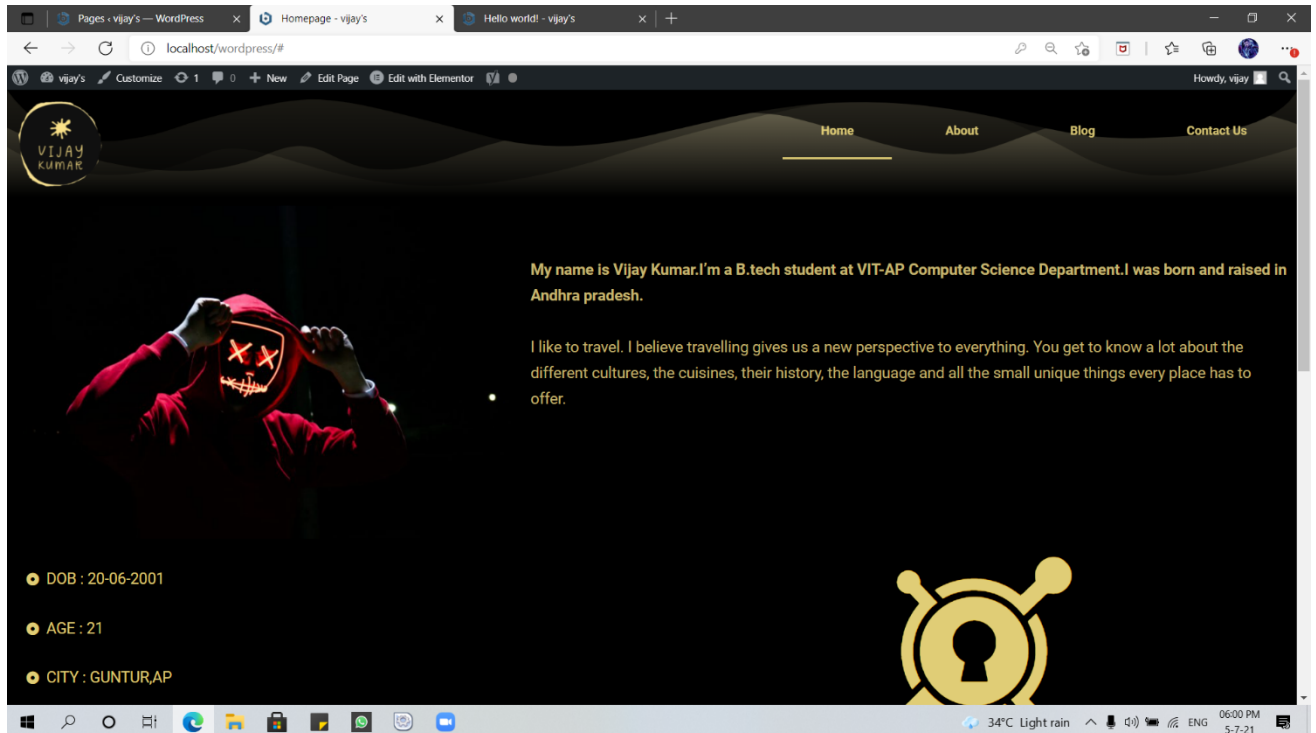

4 Experimental Investigations

The investigation includes constructing a field experiment based on a newly created WordPress site, to discover its search engine optimisation possibilities using Google Search. Both on-page and off-page optimisation are composed and implemented, which goes under the technical part of search engine optimisation.
